Western Weekly:

28th March 2014

Colleagues,

Due to various commitments for the team, this week's newsletter is a day early rather than not send one out at all. We have been busy this week with meetings with partner agencies to plan for the forthcoming spring and summer events and have been assisting our Neighbourhood teams with their Crime Prevention operations.

We are quickly approaching the time of year for nesting birds. A quick reminder, whilst you are trimming your hedgerows and tidying gardens, to be on the look out for birds nesting and try not to disturb them. Also be aware of ground nesting birds whilst walking your dogs on the forest and in nature reserves. Now we are into the lambing season, please ensure you keep control of your dogs and don't allow them to worry the livestock. Whilst on the subject of dogs, as I mentioned last week there have been a number of dog thefts across the area recently. If you have any information at all, maybe you spot someone who seemingly has a different dog each time you see them, please let us know. Those who have had dogs stolen know only too well it's like somebody taking a member of the family away. We have today been looking at dog collars with a tracking device embedded within them. Anyone who would like further information, please feel free to contact us.

The trend for equine related crime has remained with us this week. Car and leisure batteries used for electric fencing units have been targeted, probably now people are moving their horses into spring fields the opportunity to steal the batteries is too tempting for the thieves to resist. Please remain vigilant and mark your property for identification.

Kind Regards

Debby Holman Western Country Watch Sergeant
